## Origin-e

| A light weight design                              |
|--|
| Built on carbon fiber monocoque                    |
| High power to weight ratio                         |
| Precise handling and high levels of grip           |
| Vigorous acceleration                              |
| High safety standards provided by the super strong |
| monocoque  |

The results is one the most performing vehicles on tortuous tracks, a vehicle that embodies lightness, power, precise handling and safety. One of the fastest electrical cars on the market.

## POWERTRAIN DIMENSIONS

| 4 synchronous motors    | 37kw and 50Nm of torque each |
|-------------------------|------------------------------|
| Torque                  | 200 Nm                       |
| Horsepower              | 207,2 Hp                     |
| Acceleration 0-100 km/h | 2,1 Sec                      |
| Downforce @ 50 km /h    | 400 N                        |

| Length | 2900 |
|--------|------|
|        | mm   |
| Width  | 1300 |
|        | mm   |
| Height | 1200 |
|        | mm   |

## **BATTERY**

| Li-lon battery | 6,8 kWh |
|----------------|---------|
| pack           |         |
| Range          | 30 km   |

## **OTHERS**

| Maximum              | 2 g         |
|----------------------|-------------|
| deceleration         |             |
| Lateral acceleration | 2,5 g       |
| Monocoque stiffness  | 4200 Nm/rad |
| Weight               | 200 kg      |
| Weight/Power ratio   | 1 kg/Hp     |
